PROFESSIONAL PROFILE

Technologist in Information Systems Analysis and Development and Full Stack Web Developer with a strong focus on backend development. My experience encompasses technologies such as Java, Spring Boot, Node.js, Python, AWS Lambdas, AWS SQS, MySQL, PostgreSQL, Redis, and MongoDB, alongside knowledge of communication protocols like REST, SOAP, ISO8583, and WebSockets. Specialized in creating RESTful APIs and system integration, I am passionate about building scalable and efficient solutions.

I have worked on diverse projects, ranging from web applications to complex enterprise solutions. I utilize tools and methodologies such as Git, GitHub, and Scrum to ensure collaborative and high-quality development. My goal is to continue expanding my software development knowledge to offer innovative technological solutions.

TECHNICAL SKILLS

- **Back-End:** Java, PostgreSQL, NodeJS, Python, Express, JavaScript, MySQL, REST API, Docker, ISO8583, REST, SOAP
- **Front-End:** HTML, CSS, JavaScript, React
- **Other:** Git, GitHub, Scrum Methodology, MVC architecture (Model-View-Controller), Microservices

EXPERIENCE

Semi-senior Backend Developer | Puntored

May 2024 - Present

- Lead the transformation of a monolith to a microservices architecture with Spring Cloud and Spring Boot, applying design patterns to guarantee system scalability and maintainability.
- My main responsibility is to modularize and optimize our existing architecture, ensuring a smooth transition to a microservices environment.
- I specialize in refactoring existing code and integrating unit testing into microservices to improve efficiency and performance.
- I work closely with the team to identify areas for improvement and apply development best practices to ensure robust and scalable systems.

Full Stack Developer | Puntored

October 2022 - May 2024

- Contributed to the design and implementation of efficient integrations with financial, telecommunications, banking, and pin distribution service providers.
- Utilized Java, ISO8583, SOAP, and RESTful to enable a wide range of services, guaranteeing a seamless experience for end-users.
- Collaborated in the development and maintenance of a monolith built with Spring Boot, backed by MongoDB, Redis, and PostgreSQL.

- Documented our services with Postman to improve internal understanding and the integration experience for our partners and clients.

Full Stack Developer | Protalento

August 2021 - March 2022

- **Fragrance-Life Project:** E-commerce web project aiming to connect perfume sellers with clients, applying: SCRUM agile methodology, MVC development methodology, HTML5, CSS3, Responsive design, JavaScript, ECMAScript, Express, EJS, Git, and GitHub.
- React-based dashboard for the Fragrance-life e-commerce control that consumes data from a custom API to supervise the correct operation and manipulation of website data.
- **Mercado-Liebre Project:** Built an e-commerce clone webpage connecting sellers with buyers, applying practical concepts of HTML5, CSS3, Express, semantics, components, Flexbox, positioning, box model, responsive design, Git, and GitHub.

EDUCATION

- **Full Stack Developer** - Digital House (2021-2022)
- **Technologist in Information Systems Analysis and Development** - SENA (2013-2016)

ADDITIONAL INFORMATION

Courses

- ECMAScript: JavaScript history & versions - Jun 2025 - Platzi
- Software Engineering Fundamentals - Jun 2025 - Platzi
- Introduction to Application Deployment - Jun 2025 - Platzi
- Cloud Storage with Google Cloud Platform - May 2025 - Platzi
- Introduction to Google Cloud Platform - May 2025 - Platzi
- Virtual Machines with Google Cloud Platform - May 2025 - Platzi
- Practical SQL Course - Apr 2025 - Platzi
- Databases with SQL - Apr 2025 - Platzi
- Introduction to Backend Development - Apr 2025 - Platzi
- PostgreSQL applied to Data Science - Apr 2025 - Platzi
- Networking & Security in Google Cloud - Feb 2025 - Google
- Google Cloud Computing Basics - Jan 2025 - Google
- Google Cloud Computing Fundamentals - Sep 2024 - Google
- PostgreSQL - Jun 2024 - Platzi
- Java Spring - Jun 2024 - Platzi
- Microservices and REST APIs - Apr 2024 - Udemy
- Python Fundamentals - Jan 2024 - Platzi
- Practical JavaScript - Dec 2023 - Platzi
- Complete MongoDB and NoSQL - Aug 2023 - Udemy
- Docker Practical Guide - Jun 2023 - Udemy
- Terminal and Command Line - Apr 2023 - Platzi
- Professional Git and GitHub - Mar 2023 - Platzi
- Digital Image Production - Mar 2018 - SENA
- Internet of Things Seminar - Mar 2015 - SENA
- Web Application Development with PHP - Dec 2014 - SENA
- Digital Apprentice - Mar 2014 - SENA
